

The Layout of the BPM System for p-LINAC at FAIR

Mohammed. Almalki
Goethe-Universität

Beam Diagnostic Group, GSI

Group Seminar
27th Sep. 2013

Purpose of this talk

what are we *doing*?

Beam Position Monitor (BPM) along the Proton-LINAC for FAIR

Purpose of this talk

what
are we *doing?*

Beam Position Monitor (BPM) along the Proton-LINAC for FAIR

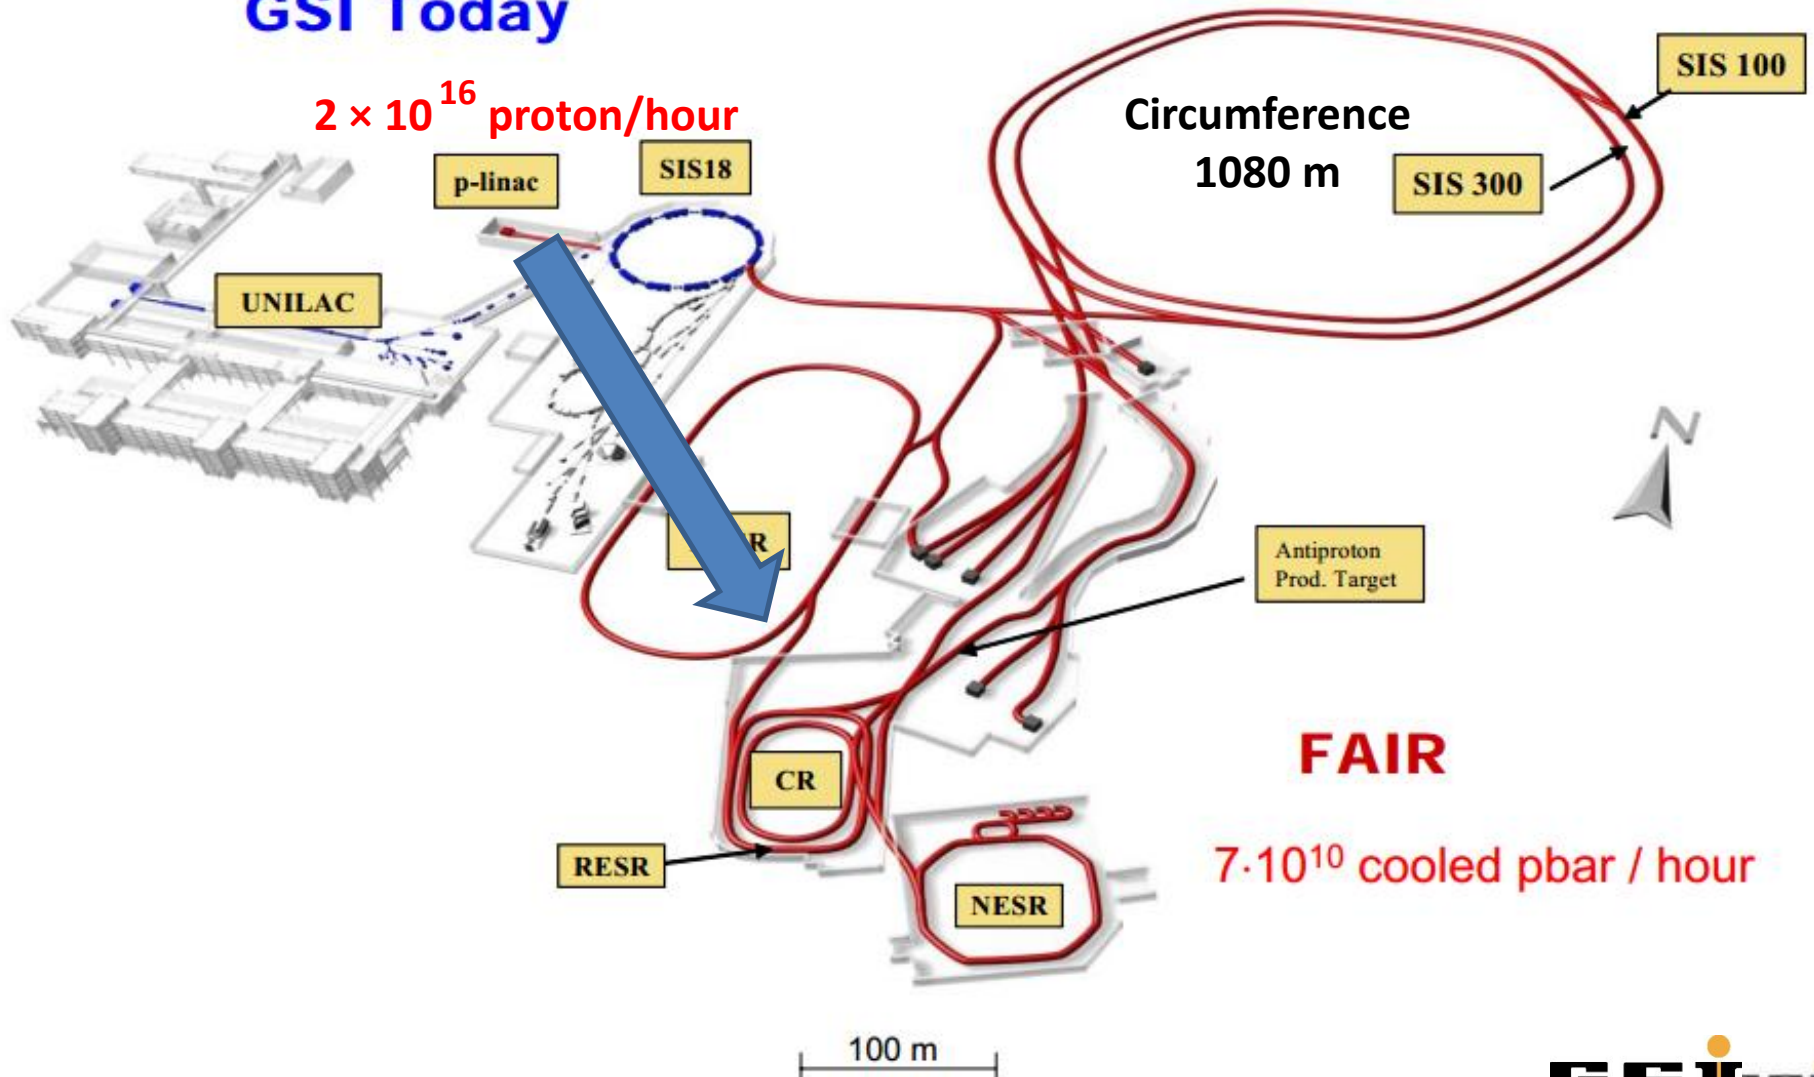

Outline

- 1 **Proton-LINAC Layout (an overview)**
- 2 **Beam Position and Beam Phase Detection**
- 3 **BPM System (**some results**)**

1 Proton-LINAC Layout (an overview)

GSI Today

1

Proton-LINAC Layout (an overview)

GSI Today

Outline

- 1 Proton-LINAC Layout (an overview)
- 2 Beam Position and Beam Phase Detection**
- 3 BPM System

2

Beam Position and Beam Phase Detection

Beam Position

Position :
0.1 mm spacial resolution

Beam Phase

Beam energy from time-of-flight (TOF):
accuracy of $1^\circ = 8.5$ ps @ 325 MHz

BPM 1

BPM 2

L
Accelerator

Position

Δt

Phase

Position

Outline

- 1 Proton-LINAC Layout (an overview)
- 2 Beam Position and Beam Phase Detection
- 3 BPM System**

3

BPM System

What are we doing ?

1

**BPM Mechanical
Design**

Final results

2

**Numerical
Calculations**

Final results

3

**Electronic
Scheme**

Final results

BPM Location
Inter-tank section
BPM design

Quadropole magnets

Position Sensitivity

RF Leakage

CCH & CH cavities

Signal Processing

Simulation

Cables

3

BPM System

What are we doing ?

1

**BPM Mechanical
Design**

2

**Numerical
Calculations**

3

**Electronic
Scheme**

The goal is :

BPM Mechanical Setup

Final results

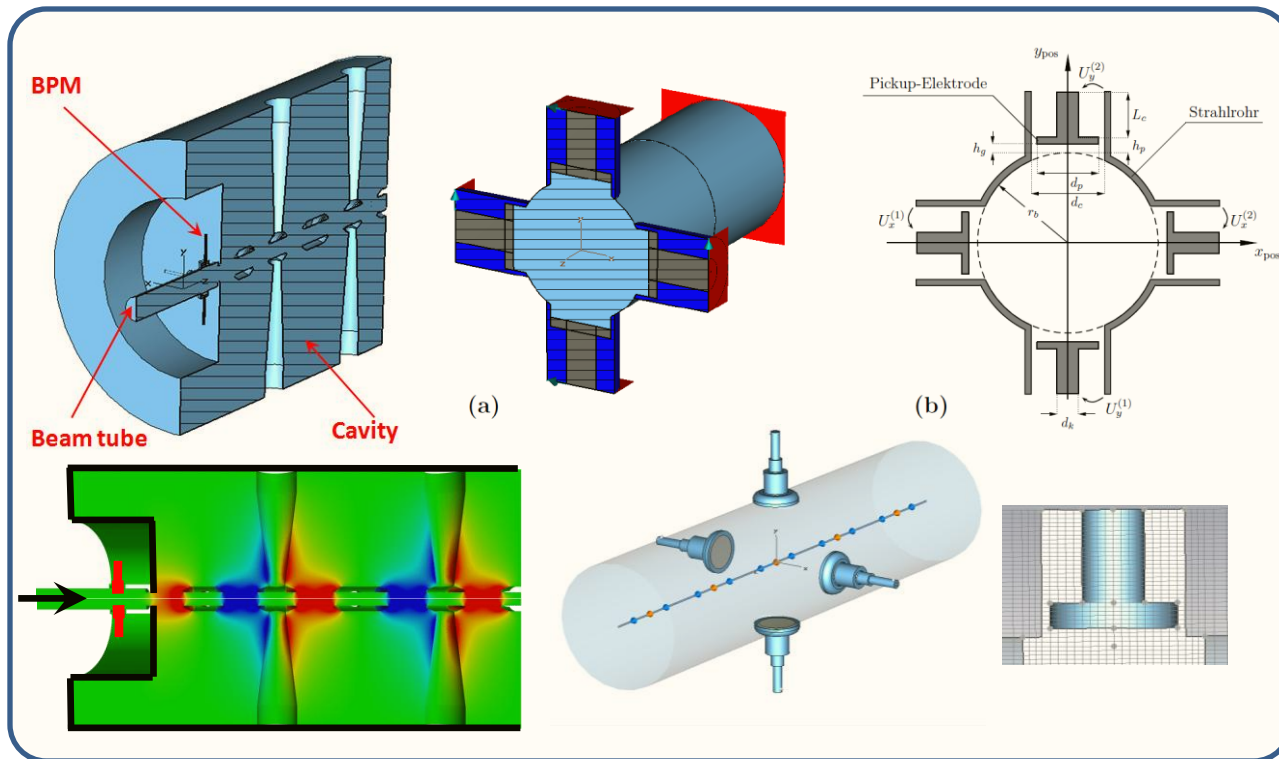

Numerical Calculations

▪ **BPM Location**

▪ **Position Sensitivity**

▪ **RF Leakage**

Parameters: BPM aperture $\text{Ø}(30 - 50)$, $f_{\text{RF}} = 325 \text{ MHz}$, Bunch length 150 ps , $0.1 < \beta < 0.3$

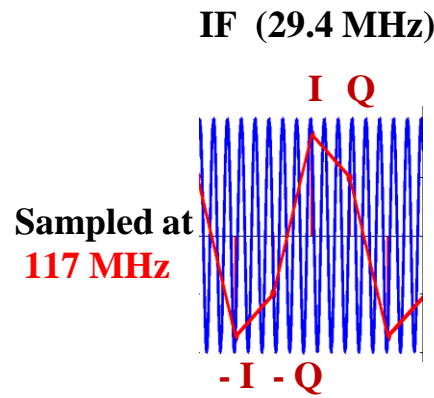

Digital Signal Processing

Signals from BPM

Libera SPH

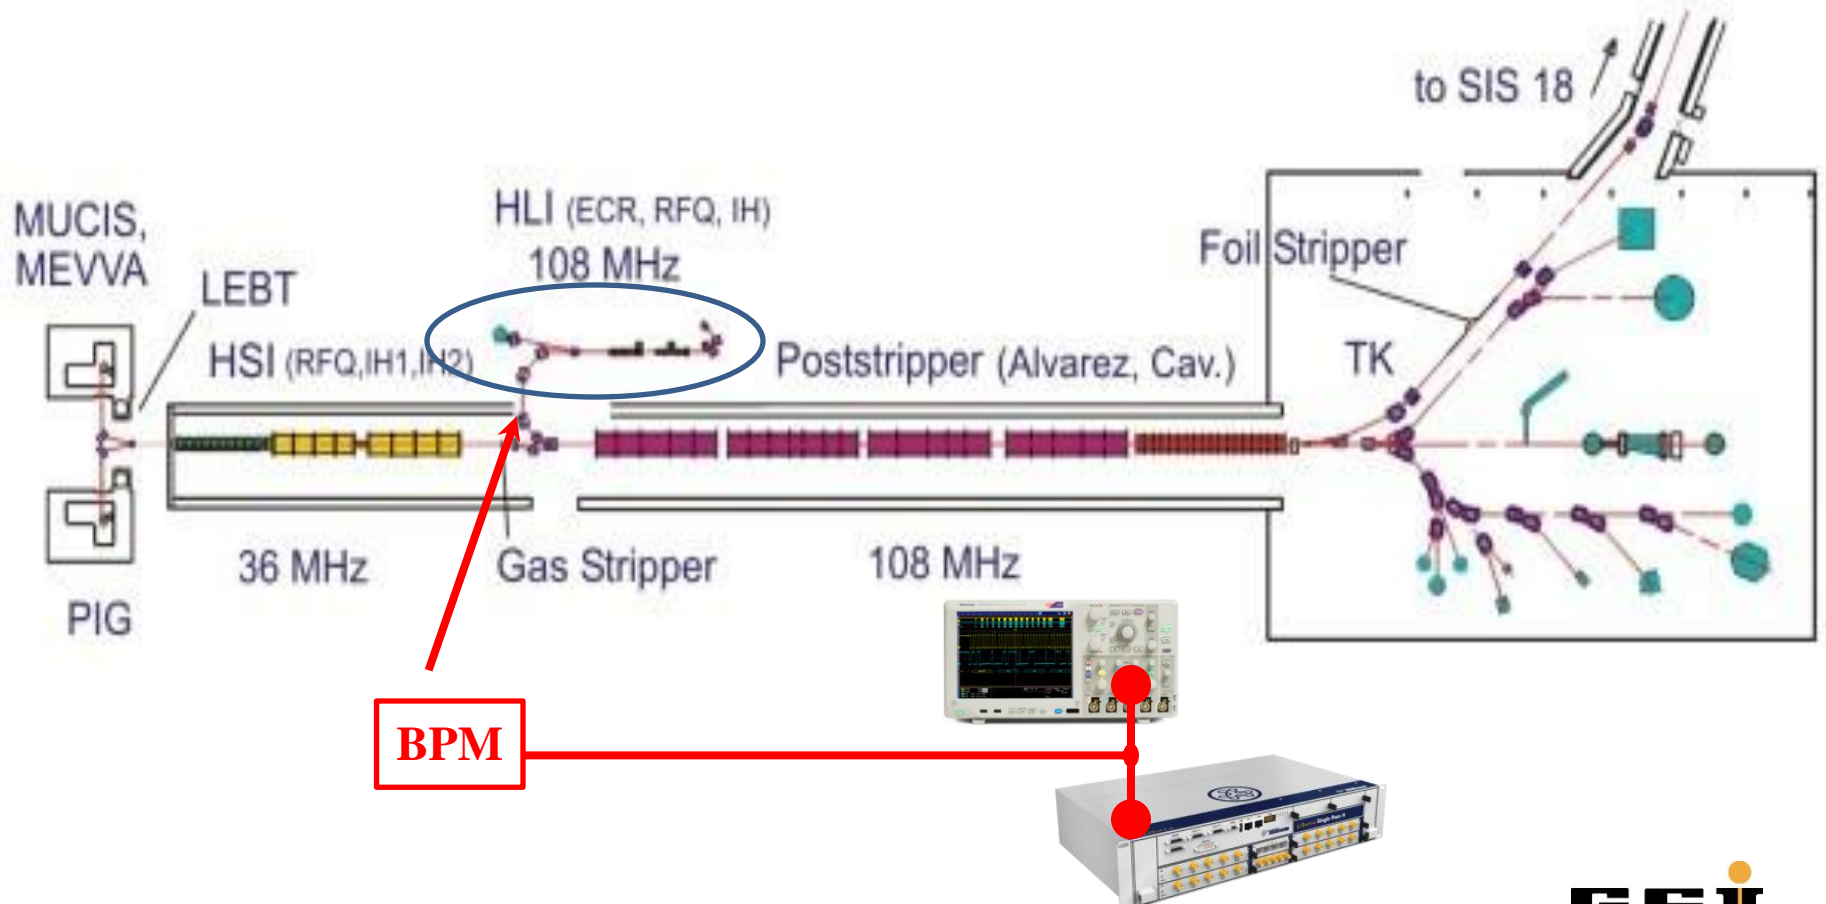

Digital processing
(IQ demodulation)

Amplitude $A_{IF} = \sqrt{I^2 + Q^2}$

Phase $\varphi_{IF} = \tan^{-1}\left(\frac{Q}{I}\right)$

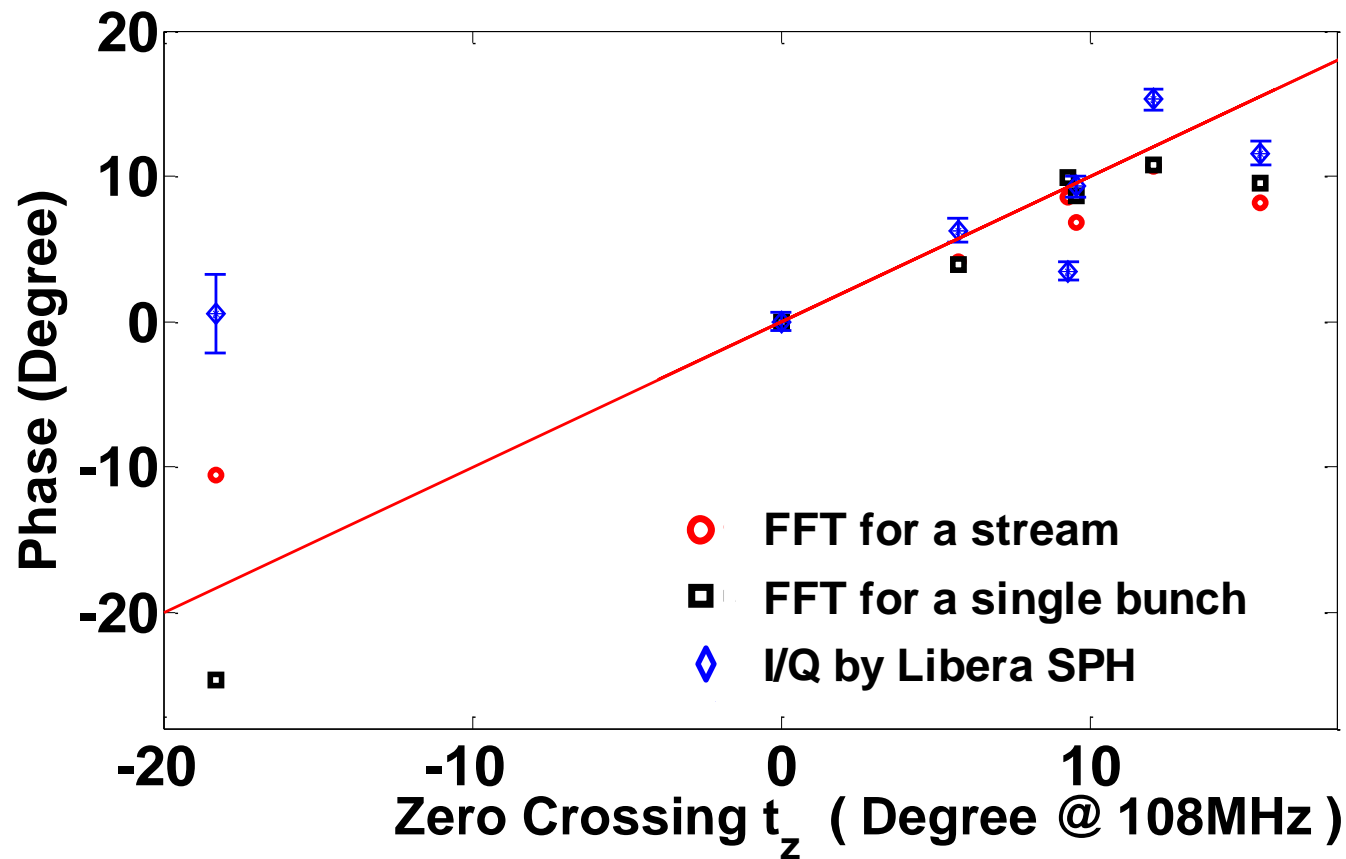

Beam-based Test for Digital Beam **Position** and **Phase** Monitor Using **Libera SPH**

Digital Signal Processing

Final results

Before I stop, let me go over the key issues again.....

BPM for Proton-LINAC

Beam Position and Beam Phase

BPM System (every thing)

Thank You
