## 1.2. GENERAL DISCUSSIONS

---

- PCI-Express problem solved by upgrading bios on CCCP#1 on latest version.
- FESA 3.0 developments will start in December; release is expected in half year after that. (Kluas: Could be already in February).
- GSI agrees that FESA 2.10 is installed on CCCP for Libera project. For GSI wide installation a clean install of FESA 2.10 in parallel with 2.9 could be done (projects would be upgraded manually). Klaus will prepare a list of things to be backed up and decision will be made on next Libera meeting (25.11).
- Raphael and Jutta are back at GSI next week.
- Plan is needed for December which people will be needed since some take longer holidays. Gasper will be in GSI till 19.11.
- Picture of FESA development procedure (cvs, oracle db) should be produced.
